

ENVIRONMENTAL POLICY

At **Jumbo** We are committed and focused on minimizing the negative impact of our tourism operations and promoting the conservation of the destinations where we operate.

We are committed to the protection and conservation of the environment in all destinations and recognize our responsibility to minimize the ecological impact of our activities and contribute to sustainable tourism.

OUR KEY PRINCIPLES IN ENVIRONMENTAL POLICY:

COMPLIANCE AND CONTINUOUS IMPROVEMENT

Legal Compliance: Strict commitment to the compliance with all applicable local, national, and international environmental legislation

Promote the adoption of environmental management criteria that contribute to the continuous improvement of the organization's ecological performance, driving the definition of objectives and targets, as far as possible.

EFFICIENT USE OF RESOURCES AND IMPACT REDUCTION

Waste Management: Prioritize the reduction, reuse, and recycling of solid and liquid waste generated in offices, transport, and excursions.

Energy and Water Efficiency: Promote the responsible and efficient use of water and energy in all facilities and vehicles, opting for renewable sources and low-consumption technologies when viable

Sustainable Transport: Favor, as far as possible, the use of means of transport with a lower impact in carbon emissions in operations.

CONSERVATION AND RESPONSIBILITY TOWARDS DESTINATIONS

Biodiversity Protection: Promote the development of activities respectful of the natural environment, striving to minimize, as far as possible, the impact on local flora and fauna.

Responsible Ecotourism: Raise customer awareness about the importance of adopting responsible behavior toward the environment, promoting low-impact practices during activities.

Supplier Selection: Positively value collaboration with local suppliers and partners who accredit good environmental practices or a commitment to sustainability

COMMUNICATION, TRAINING, AND AWARENESS

Personnel Training: Foster staff awareness regarding sustainability and environmental respect, promoting the adoption of good practices in the performance of their duties.

Customer Information: Provide customers, where appropriate, with information on the importance of adopting responsible conduct toward the environment during activities.

Transparency: Show commitment to transparency in environmental matters, valuing the possibility of communicating progress and good practices when appropriate.

These principles and objectives inspire the actions of Jumbo and may serve as a reference in the relationship with suppliers and other interested groups related to the ENVIRONMENTAL POLICY
